

20th January 2020

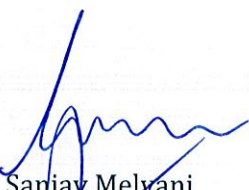

To whom it may concern:

I would like to recommend Edifice Consultants as we have worked with them since their inception and found the organisation to be professional, highly experienced and most importantly approachable. As we work more closely with Chaaminda and his team, we have found him to be flexible in accommodating our request, efficiently executing projects as well as being quite competitive in terms of costs. I would not hesitate to recommend their services.

A few of the Structural Engineering Design and QA and QC services provided by EDIFICE for projects completed in 2019:

1. Biomass Boiler Project- 12 TPH @ 21 BAR pressure was completed and in operation since June 2019
2. Installation of 9 Press Pits (13ft X 16ft X 15ft) Structural works and part of the installations completed in December 2019

Kind Regards,

Sanjay Melvani
